Processing Policies

Funds Availability (When your deposits will be made available.)

Generally, funds from check deposits are available during nightly processing on the business day that we receive the deposit. Cash, wire transfers, and the first \$100 of check deposits received in person at a branch will be immediately available. Funds from an electronic direct deposit will be available on the day we receive settlement for the deposit.

Special rules apply for how much is immediately available from ATM deposits as outlined below:

- At the envelope-free BB&T ATMs, all cash and the first \$100 of your total check deposits received before 6:00 PM will be made immediately available
- For deposits received at BB&T ATMs that require an envelope, the first \$100 of your total deposits received on a business day will be made immediately available

If we place a hold on a check deposit, it will not be available according to the schedule outlined above. **Please see the Bank Services Agreement for more information on holds, mobile deposits, other types of deposits, business days, and our full availability policy.**

Posting (How we process your deposits and withdrawals.)

In general, BB&T will post most debit transactions to your account in chronological order. Chronological posting is utilized when the bank can identify both date and time information for the transaction. For each processing day, we post transactions in the following order:

- All credits (deposits)
- Debits with date and time information in chronological order.
- Debits without date and time information in low to high dollar amount
- Checks in sequential order

When date and time information is available, prior day debits and fees will post before current day debits and fees. Items sent by merchants for authorization prior to being submitted for final payment will post according to the date and time of the authorization request.
